4.5.2	Spare parts list - type with measuring unit GS	19, 20
5.	Parts for maintenance purposes	21, 22

1. General information

All persons involved with the assembly, operation and/or maintenance of pressure reducer HON 219 must read and understand all of the following documents:

- Technical product information 219.00 - it contains the equipment's technical data and dimensions as well as instructions concerning set-up and mode of operation.
- General operating manual for gas pressure regulators and safety devices – this Honeywell document contains information on assembly and operation as well as general information on troubleshooting.
- Operating and maintenance instructions/spare parts 219.20 – this document contains more detailed information on assembly and operation of pressure reducer HON 219.

There are national laws and regulations for all sorts of jobs on gas pressure governors, from planning to maintenance. Be sure to comply. (In Germany, for instance, DVGW work sheets G 600, G 459/II, G 491 and G 495.)

Inspection and maintenance intervals depend mostly on operating conditions and the nature and properties of the gas. There are no general rules or recommendations for intervals. For Germany, we recommend to consider maintenance intervals as stated in DVGW work sheet G 495 in a first instance. However, in the mid-term, intervals must be adapted to the requirements of each specific equipment.

During maintenance, components must be cleaned and then checked thoroughly. This is necessary even if there have not been any unusual observations during operation and/or functional testing. Checks must focus,

in particular, on diaphragms and seals and all movable parts and their respective bearings. Any and all defective parts must be replaced with new ones. The same applies to O rings removed during disassembly. Do not use any spare/wear parts and/or oils & lubricants not specifically recommended in the Honeywell operating and maintenance instructions for spare parts.

In the event spare/wear parts and/or lubricants & oils other than those specifically recommended are used, Honeywell shall not be liable for any defects and/or consecutive damages attributable to such use of illegal parts, lubricants, oils etc.

Item numbers mentioned in the specific operating and maintenance instructions correspond with the numbers in the spare parts lists and drawings.

Some parts in the lists and drawings are marked with a letter "W". We recommend to always have a reserve of those parts in stock for maintenance purposes. Those spare parts are put together in another separate list at the end of the spare parts list.

1.1 Safety information

In this manual, safety information is highlighted by means of the following titles and eye catchers:

Eye catcher	used for:
	Danger to life and limb
	Danger of damage to property and/or the environment
	Important additional information

2. Specific operating instructions

2.1 Changing setpoints

- Increase the setpoint by turning the setpoint adjusting screw. Having changed the setpoint of the control stage, be sure to secure the setpoint adjuster using flat head screw (213, 313) or nut (3).

Note

Safety relief valve does not allow the setpoint to be changed.
 The following setpoints have been pre-set:
 – 5 bar approx. – for measuring units M, G, GS, F
 – 10 bar approx. – for measuring unit V

3. Specific maintenance instructions

- Be sure to adjust the connection between lever and lever eye to the central position. Find the central position by test-turning the diaphragm all the way to the stops on the left and on the right.

! Danger

- Replacing distance piece (23)

Do not dismount inlet connection piece (23, 59).

When installing the pressure reducer on a pipework system and when removing it, be sure to use an SW wrench to secure inlet connection piece (23, 59) and outlet connection piece (33) so they don't move and/or come loose.

When replacing jet connecting piece (23) and/or distance piece with jet and piston guide (28), be sure to observe proper piston mounting position.

See also "Mounting and dismounting sealing shim (29)".

- Mounting and dismounting sealing shim (29)

When dismounting piston and seal (29): Do not start to unscrew jet connecting piece (59) and/or distance piece with jet and piston guide (23, 27, 28) before you have dismounted cap (4) from body (18).

When mounting piston and seal (29): always mount together with jet connecting piece (59) and/or distance piece with jet and piston guide (23, 27, 28) while diaphragm (10) and cap (4) are still off. Be sure to find the correct mounting position of the piston inside the jet.

3.1 Tightening torques M_A in Nm

Screws & bolts – item no.	Tightening torques M_A in Nm
8, 208, 308	8

3.2 Lubricants

Components	Lubricants	HON part no.
All O rings Clamping area of the diaphragm Slip faces of pistons	Silicone grease Slip agent (ammonia)	27081 28211
Thread of setpoint adjusting screw/ adjusting spindle All fastening screws and screwed pipe connections	Assembly paste Slip agent (ammonia)	27091 28211

4.1.1 Spare parts drawing – type with measuring unit M
 Jet - Ø2, Ø3.7 and Ø5.5

M_A Be sure to comply with tightening torques in table on page 4.

W Parts should be held in stock for maintenance purposes.

For section views see page 6.

59	Jet connecting piece G 3/4 external for jet Ø 10	1		Ms	10014906	NSt	10014908	
59	Jet connecting piece G 1/2 internal, jet Ø 10	1		Ms	10015100	NSt	10015103	
60	Plug M 12x1.5	1		Ms	10015022	NSt	10015025	
61	Sealing ring	2	W	LM	18796	LM	18796	
62	Straight pin	1		NSt	17122	NSt	17122	
301	Hex adjusting ring	1		NSt	10014954	NSt	10014954	
302	Control spring, optional:							
302	Control spring F7 Ø 8 for Wds 0.25 to 2.5 bar	1		FSt	10014963	FSt	10014963	
302	Control spring F8 Ø 9 for Wds 0.35 to 3.5 bar	1		FSt	10014964	FSt	10014964	
303	Adjusting spindle, complete	1		NSt/Ms	10014949	NSt	10014948	
304	Cap	1		GLM	10014955	GLM	10014955	
305	Hex nut	1		St	10014696	St	10014696	
306	Spring plate	1		LM	10014942	LM	10014942	
307	Tooth lock washer		1		FSt	14107	FSt	14107
308	Hex screw	10		St	10024	St	10024	
309	Diaphragm disc	1		St	10014981	St	10014981	
310	Diaphragm (2.5 mm thick)	1	W	KG	10014970	KG	10018118	
311	Lever eye	1		NSt	10016683	NSt	10016683	
312	Grooved taper pin		1		St	6646	St	6646
313	Flat head screw	1		St	5888	St	5888	
314	O ring	1	W	KG	20331	KG	20331	
315	Hex nut	10		St	3399	St	3399	
316	Diaphragm disc	1		Ms	10014971	NSt	10014973	
317	Sealing ring	1	W	KG	20693	KG	20746	
318	Intermediate ring		1		LM	10014980	LM	10014980
319	Retaining screw	3		Ms	10016688	NSt	10016690	
320	Diaphragm support ring	1		LM	10016687	LM	10016687	

5. Parts for maintenance purposes

Item no.	Denomination	Number	Part no.	
			Standard version	Ammonia version
Parts for measuring unit M				
10	Diaphragm	1	10014989	10018122
17	Sealing ring	1	18688	18688
24	Sealing ring 1 mm	1	18814	18814
25	Sealing ring 1.5 mm	1	18815	18815
26	Sealing ring	1	18811	18811
29	Sealing shim, at option:			
29	Sealing shim for jet \varnothing 2, \varnothing 3.7, \varnothing 5.5	1	10014473	10014476
29	Sealing shim for jet \varnothing 8	1	10014485	10014487
29	Sealing shim for jet \varnothing 10	1	10014495	10015106
32	Sealing ring	1	4428	4428
51	Sealing ring	2	18818	18818
53	Sealing shim	1	10014082	10014085
61	Sealing ring	2	18796	18796
Parts for measuring unit F				
10	Diaphragm, optional:			
10	Diaphragm for W_d up to 16 mbar	1	10015466	10019409
10	Diaphragm for W_d up to 40 mbar	1	10015468	10019410
17	Sealing ring	1	18688	18688
24	Sealing ring 1 mm	1	18814	18814
25	Sealing ring 1.5 mm	1	18815	18815
26	Sealing ring	1	18811	18811
29	Sealing shim, at option:			
29	Sealing shim for jet \varnothing 2, \varnothing 3.7, \varnothing 5.5	1	10014473	10014476
29	Sealing shim for jet \varnothing 8	1	10014485	10014487
29	Sealing shim for jet \varnothing 10	1	10014495	10015106
32	Sealing ring	1	4428	4428
51	Sealing ring	2	18818	18818
53	Sealing shim	1	10014082	10014085
61	Sealing ring	2	18796	18796
102	Sealing ring	1	18818	18818
104	Sealing ring	1	8032	8032
Parts for measuring unit V				
17	Sealing ring	1	18688	18688
24	Sealing ring 1 mm	1	18814	18814
25	Sealing ring 1.5 mm	1	18815	18815
26	Sealing ring	1	18811	18811
29	Sealing shim, at option:			
29	Sealing shim for jet \varnothing 2, \varnothing 3.7, \varnothing 5.5	1	10014473	10014476
29	Sealing shim for jet \varnothing 8	1	10014485	10014487
29	Sealing shim for jet \varnothing 10	1	10014495	10015106
32	Sealing ring	1	4428	4428
51	Sealing ring	2	18818	18818
53	Sealing shim	1	10014082	10014085
61	Sealing ring	1	18796	18796
210	Diaphragm	1	10014989	10018122
214	O ring	1	20331	20331
215	Ring	1	10015450	10015450

Parts for maintenance purposes

Item no.	Denomination	Number	Part no.	
			Standard version	Ammonia version
Parts for measuring unit G				
17	Sealing ring	1	18688	18688
24	Sealing ring 1 mm	1	18814	18814
25	Sealing ring 1.5 mm	1	18815	18815
26	Sealing ring	1	18811	18811
29	Sealing shim, at option:			
29	Sealing shim for jet Ø 2, Ø 3.7, Ø 5.5	1	10014473	10014476
29	Sealing shim for jet Ø 8	1	10014485	10014487
29	Sealing shim for jet Ø 10	1	10014495	10015106
32	Sealing ring	1	4428	4428
51	Sealing ring	2	18818	18818
53	Sealing shim	1	10014082	10014085
61	Sealing ring	2	18796	18796
310	Diaphragm, optional:			
310	Diaphragm up to 0.04 bar	1	10014905	10019405
310	Diaphragm up to 0.1 bar	1	10014967	10018106
310	Diaphragm up to 1.0 bar	1	10014968	10014969
310	Diaphragm up to 2.0 bar	1	10014970	10018118
314	O ring	1	20331	20331
317	Sealing ring	1	20693	20746
321	Sealing ring (for Diaphragm 0.4 mm thick)	1	10015116	10015116
Parts for measuring unit GS				
17	Sealing ring	1	18688	18688
24	Sealing ring 1 mm	1	18814	18814
25	Sealing ring 1.5 mm	1	18815	18815
26	Sealing ring	1	18811	18811
29	Sealing shim, at option:			
29	Sealing shim for jet Ø 2, Ø 3.7, Ø 5.5	1	10014473	10014476
29	Sealing shim for jet Ø 8	1	10014485	10014487
29	Sealing shim for jet Ø 10	1	10014495	10015106
32	Sealing ring	1	4428	4428
51	Sealing ring	2	18818	18818
53	Sealing shim	1	10014082	10014085
61	Sealing ring	2	18796	18796
310	Diaphragm	1	10014970	10018118
314	O ring	1	20331	20331
317	Sealing ring	1	20693	20746
